

SOSF

A CRYPTO AI PROJECT TO
HELP WHEN CLIMATE
CHANGE *STRIKES*

Updated: September 20th, 2023

SOSF's Whitepaper

Original Date of publication: November 24th, 2021.

Updated Last on: September 19th, 2023

This Whitepaper applies to SOSF's project and its own crypto asset SOSF.

This document is not a solicitation of investment and does not in any way refer to an offer of securities in any jurisdiction. This document describes the purpose of the project, its way of work and the tokenomics behind SOSF.

CONTENTS

1. Climate Change and AI
2. SOSF
3. Humanitarian Aid
4. Lower Taxes for SOSF holders
5. Disclaimers

With kind Regards from our Executive Team!

1 Climate Change and AI

AI-Driven Disaster Analysis

Harnessing Innovation for a Safer Tomorrow

In a world marked by the increasing frequency and severity of natural disasters, early prediction and effective response have never been more critical. At the heart of our cryptocurrency project lies an innovative solution powered by Artificial Intelligence (AI) – one that promises to revolutionize disaster preparedness and response.

The Challenge:

Natural disasters, whether they be hurricanes, wildfires, earthquakes, or floods, take an enormous toll on human lives and livelihoods. The unpredictable nature of these events poses a significant challenge for governments, relief organizations, and communities. Traditionally, response efforts have often been reactive, arriving after disaster strikes. The result? Inefficiency, loss of lives, and colossal economic consequences.

The Solution:

Our project takes a proactive approach to disaster management through cutting-edge AI technology. By harnessing the power of machine learning and data analytics, we've created a system capable of processing vast datasets in real-time. This AI continuously monitors environmental factors, climate patterns, geological shifts, and other relevant data sources. The result is a sophisticated predictive model that identifies high-risk areas and forecasts impending disasters with remarkable precision.

2 SOSF Token

SOSF is a cryptocurrency deployed on the Binance Smart Chain with smart contract address:

0x0bd669a4cE836f70c3814b22a142116851D2c04A

The value of the SOSF Token will have absolutely no connection to the prosperity of the SOS Fidelity organization. The token will be used, if necessary, to provide liquidity for any emergency help, in case there are no donations in reserve.

To avoid volatility, each year we will release 10% of the total amount of minted tokens on centralized exchanges.

SOSF is not mintable but can be burnt.

There will be no restrictions on secondary sale, buy-back options or 'right of first refusal'.

3 HUMANITARIAN AID

Empowering Compassion, Building Resilience

While advanced technology plays a pivotal role in disaster prediction, it is the strength of communities and their collective compassion that truly drives change. At the core of our cryptocurrency project is a commitment to support those affected by natural disasters, and we do so with a resounding promise: 90% of all donations and contributions will directly fund humanitarian aid for those in need.

The Heart of Our Mission:

We firmly believe that we are not just investors or stakeholders; we are a global community united by a common purpose. Together, we understand the profound impact that natural disasters have on the lives of individuals and communities. The devastation caused by these events can be overwhelming, leaving people without homes, resources, and often, a sense of hope.

Your Investment, Their Lifeline:

When you invest in our cryptocurrency project, you are not merely seeking financial returns; you are extending a lifeline to those who need it most. We pledge that 90% of all funds raised through our project will be allocated to humanitarian aid efforts, including: Emergency Relief, Reconstruction and Rehabilitation and Resilience Building.

4 LOWER TAXES FOR HOLDERS

Unlocking Financial Benefits for a Sustainable Future

At the intersection of financial innovation and global responsibility, our cryptocurrency project introduces a groundbreaking approach to incentivize responsible investment. We are actively engaging with governments to lower income taxes for crypto profits, and here's how it works:

Government Collaboration:

Our project is not just about crypto; it's about fostering a symbiotic relationship between investors and governments to drive positive change. We are in ongoing discussions with governmental bodies to establish tax incentives for token holders. These discussions revolve around recognizing the unique role our project plays in addressing critical global issues like natural disasters and climate change.

Token-Based Tax Reductions:

The more tokens you hold, the greater your potential tax reduction. This mechanism encourages long-term commitment and investment in our project. However, what sets us apart is the precision of our tax reduction calculations. We employ a sophisticated AI algorithm that assesses various factors, including the number of tokens held, duration of ownership, and your overall contribution to our mission.

AI-Driven Tax Optimization:

Our AI algorithm is not just about determining tax reductions; it's about optimizing them for both investors and our mission. The algorithm takes into account the dynamic nature of cryptocurrency markets and your specific circumstances to provide tax benefits that align with your investment strategy. This ensures that you receive the maximum tax advantage while contributing to our cause.

Empowering Responsible Investment:

Investing in our project not only offers the potential for financial growth but also provides a unique opportunity to reduce your income tax burden. This approach to tax incentives transcends traditional philanthropy, allowing you to invest in a project that directly addresses global challenges while benefiting your financial portfolio.

Transparency and Compliance:

We are committed to maintaining complete transparency and adhering to all relevant tax regulations. Rest assured, our tax reduction mechanisms will be fully compliant with local tax laws and subject to regular audits to ensure fairness and accountability. Invest with us and be part of a revolutionary approach to responsible investment. Your commitment not only supports our mission but also unlocks financial benefits for a sustainable future.

ROADMAP

5 ROADMAP

- 1  Trading Competitions & Airdrops 12.2023- 02.2024
The SOSF token will conduct several airdrop campaigns until February 2024. On the 1st of December 2023 a trading competition will commence on the DEX-Trade Exchange platform for all members but investors will be able to make purchases OTC.
(The offering in USA will be determined after the end of SEC vs. XRP 2020)
- 2  Growth and Development 02.2024-12.2024
The Project will begin building the necessary networks and establishments in order to begin a worldwide operation.
- 3  Staking as a Financial instrument from 06.2024
Halfway through the development of our infrastructure and suitable partners, the implementation of the "staking" option will begin as a financial instrument. A team in Germany will have the responsibility of doing the work, fine-tuning every possible aspect. We remind you that the rewards for staking will be received in BNB!!
- 4  The Help Begins 2025
After the required funds are available, the full project can begin its work and start helping every victim of a natural disaster in the world and begin to combat Climate Change!

6 DISCLAIMER OF LIABILITY

Negotiations involving cryptocurrencies are considered high-risk activities, where prices may change significantly over time. With respect to price fluctuations, the book value may be increased or decreased significantly at any time. All currencies, virtual or not, have the potential to drastically change their value or even become meaningless / worthless. There is a high risk of loss as a result of buying, selling or trading in any market. SOS Fidelity is not responsible for changes in the exchange variation of the value of the SOSF token.

Cryptocurrency trading also has an additional risk that is not experienced by other type of currencies or other commodities in the market. Unlike most currencies that are guaranteed by the government or other legal institutions, or by gold and silver, virtual currency is a "virtual" currency solely guaranteed by technology and trust. There is no central bank that can control, protect the value of crypto in crisis, or print the currency.

To the maximum extent permitted by applicable laws, regulations and rules, SOS Fidelity is not liable for any indirect, special, incidental, consequential or other damages of any kind, in civil liability, contract or otherwise (including, but not limited to loss of revenue, profit or loss, and loss of use or data) arising out of or in connection with any acceptance or trust in this Whitepaper.

NO REPRESENTATION AND WARRANTY

SOS Fidelity does not represent and/or warrant, and hereby disclaims, any representation, warranty or commitment in any manner to any entity or person, including any representation, warranty or commitment regarding the accuracy and completeness of any information contained within this Whitepaper.

7 DISCLAIMER OF LIABILITY

The user acknowledges that the SOSF token should not be interpreted, treated or classified as: any currency other than cryptocurrency; debentures, shares or shares issued by any person or entity; rights, options or derivatives relating to such debentures, shares; rights under a contract for differences or under any other contract whose intended purpose or purpose is to secure a profit or to avoid a loss; units in a collective investment scheme; units in a business trust; derivative units in an enterprise trust; any other security or class of securities.

The user claims to have knowledge of the operation, functionality, use, storage, transmission mechanisms and other material characteristics of cryptocurrencies, blockchain-based software systems, cryptocurrency wallets or other related tokens storage mechanisms, blockchain technology and smart contract technology .

The user agrees and acknowledges that SOS Fidelity or any member of the SOS Fidelity's team is not liable for any indirect, special, incidental, consequential or other damages of any kind, in connection with any offense, contract or otherwise (including, without limitation, loss of revenue , income or profits, and loss of use or data) arising out of or in connection with any acceptance or reliance on this Whitepaper or any part thereof for the user.

Each User is responsible for all tax, tax and legal obligations arising from his operations and use of the services of SOS Fidelity. In no event shall SOS Fidelity be liable for any taxes or obligations of the User.

All representations and warranties above are true, complete, accurate and non-misleading from the time of your access and / or acceptance of possession of this Whitepaper or part thereof (as the case may be).
